

# KOTELNA PARK

## Technical specification

„Now more than ever there is a need for fresh clean air in the workplace.“

- Double filtration ensures the highest quality of distributed air
- Two level heat recovery system with rotary recuperation and integrated heat pump guarantees high energy efficiency and significantly reduced operating costs
- Precise adiabatic humidity control
- Environmentally friendly chilled beam induction units ensure a natural and smooth change in temperature
- State of the art energy efficient Daikin units with “free cooling” system
- Recycling of rainwater to water the garden and park greenery
- Connectivity for electric car charging, bicycle storages and showers
- LED lighting throughout
- Pre Breeam - Very Good
